ArtCoat / Pour Gloss Instructions & Info

Non Toxic & Food Grade

1:1 by Volume

ArtCoat / Pour Gloss is used for artwork, coasters, jewelry and other shallow casts. As it is 1:1 it is easy to use and great for beginners or those who want to have a play around with different resins. Food Grade and Non-Toxic makes it an amazing resin as it is safe for children to be near as well as food and drinks to be served on.

Mix 1 part A to 1 Part B by volume. Mix resin and hardener together, the resin will go cloudy - keep mixing until resin goes back to clear *always mix by hand*. Make sure all of the product has been mixed, including scraping the sides of the mixing container. Pour resin and allow to cure.

Depth of Resin: Artcoat / Pour Gloss Resin can be used as a coating resin and can be poured to maximum depth of 10mm

Setting time of Resin: Working time: 1 ½ Hours
Initial Cure: 12 Hours
Full Cure: 3 Days

*Please note that the resin times are based on 25°C lab tested results and will vary on depth of pour and temperature.

Resin will not set below 10°C, and will take longer in a cooler environment, make sure on cooler days that the resin is in the sun or near heat, you can warm the bottles in hot tap water before pouring to allow the resin to heat up a bit.
